

What is claimed is:

1. A portable terminal device having, in the upper part,  
a screen display section and, in the lower part, a key  
manipulation section having an array of a plurality of keys,  
5 comprising:

a first outer housing that covers the back side of  
contents including the screen display section and the key  
manipulation section;

a second outer housing that covers the front side of the  
10 contents including the screen display section and the key  
manipulation section, the first and second outer housings  
having an outer opening formed at the bottom end thereof;

a first inner housing that is disposed in the inner space  
formed by the first and second outer housings and forms an  
15 inner wall of a battery compartment close to the first outer  
housing, a battery being slid into the battery compartment  
through the bottom end of the battery compartment;

a second inner housing that is disposed in the inner space  
formed by the first and second outer housings and forms an  
20 inner wall of the battery compartment close to the second  
outer housing, the first and second inner housings having  
an inner opening for battery insertion/removal formed at the  
bottom end thereof; and

a third outer housing serving as a lid for closing the  
25 outer and inner openings in an openable manner,

wherein the key manipulation section is disposed on the  
second inner housing.

2. The portable terminal device according to claim 1,  
further comprising a circuit board disposed in the first outer  
housing, the screen display section being disposed on the  
5 circuit board at the upper part thereof,

wherein the first inner housing covers the circuit board  
in cooperation with the first outer housing and surrounds  
the side faces of the screen display section.

10 3. The portable terminal device according to claim 1,  
wherein a joint between the housings is filled with a filler.

4. The portable terminal device according to claim 1,  
wherein the circuit board is coated with a filler.

15

5. The portable terminal device according to claim 1,  
wherein a label is affixed to or printed on a wall of the  
third outer housing which constitutes an inner wall of the  
battery compartment.
